**Weight-Reduced
Hydraulic Accumulators**

E 3.305.0/04.11

HYDAC Your Reliable Partner for Successful Applications.

HYDAC has been developing, manufacturing and distributing hydraulic accumulators of all types for over 45 years.

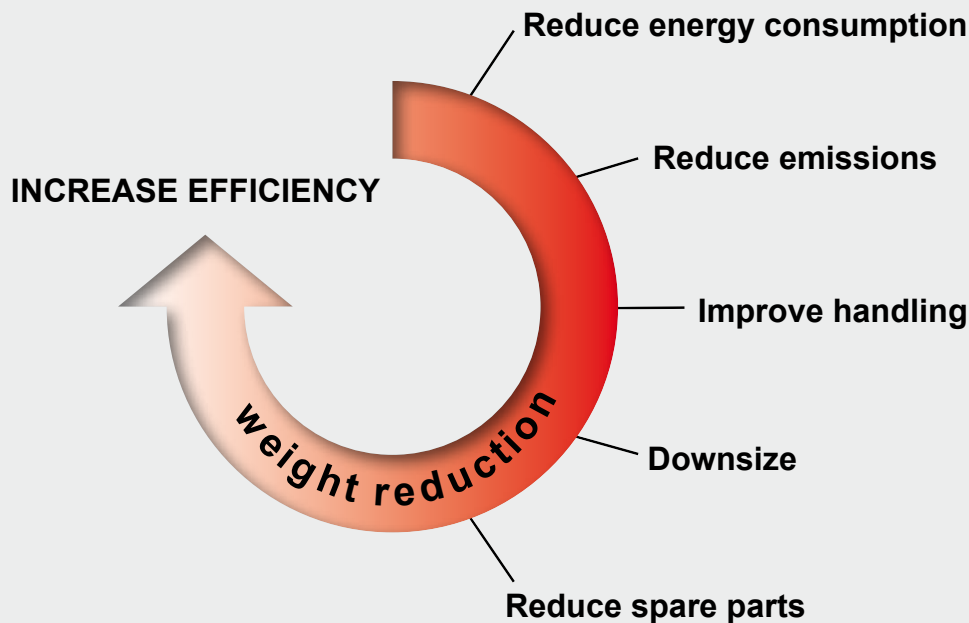

In order to meet the demands of a wide variety of industries, HYDAC has also developed reduced-weight accumulators.

This product range includes both diaphragm as well as bladder and piston accumulators.

They can be manufactured either in a weight-optimized, or a light-weight or ultra-light design.

EFFICIENCY IS BOOSTED BY REDUCING THE WEIGHT!

HYDAC has taken relevant industry requirements on board and, in reducing the weight by more than 80%*, has contributed to boosting efficiency for its customers products.

* in comparison to an equivalent carbon steel construction

FROM STANDARD TO ULTRA LIGHT-WEIGHT

The HYDAC product range of weight-reduced hydraulic accumulators is very varied.

Below you will find an example of each of the different accumulator types - bladder, piston and diaphragm.

HYDAC Your Reliable Partner for Successful Applications.

APPLICATION EXAMPLE: Aircraft industry

Category: Light-weight
Product: Bladder accumulator
Accumulator type: SB209L-1 litre
Application: Energy storage in the hydraulic system of a passenger aeroplane.

ADDITIONAL APPLICATIONS

Advantages for the Offshore industry:

- Improve handling
- Reduce weight of the entire system

Advantages in stop-and-go operation, e.g. city bus, garbage trucks or transport vehicles:

- Reduce energy consumption
- Reduce emissions
- Reduce noise
- Reduce spare parts

Advantages for the wind power industry:

- Improve handling for installation and maintenance

Advantages for the Automotive industry:

- Reduce energy consumption
- Reduce emissions
- Reduce noise
- Reduce spare parts

Advantages for railway vehicles:

- Reduce emissions
- Reduce noise
